SUMMARY

I am a Computer Science with specialization in Data Science student at SRM with strong programming and analytical skills. While my academic background equips me with knowledge in data-driven problem-solving, I am passionate about Android development and mobile technologies. I am actively learning Android frameworks, app design, and mobile-first solutions to build innovative applications that combine data science with user-centric experiences.

EXPERIENCE

Web Developer Intern
Routa Digital India

Jun 2026 – Present

- Develop frontend modules for enterprise cyber-risk management, including analytics dashboards, phishing simulations, security training, reporting, user management, and dynamic groups.
- Build reusable React and TypeScript components, multi-step forms, data tables, risk visualizations, and responsive interfaces integrated with REST APIs.
- Translate product requirements into scalable workflows for campaign creation, user risk assessment, training assignments, content management, and role-based access.
- Collaborate with product, backend, and QA teams to test features, resolve defects, optimize performance, and improve usability across devices.

PROJECTS

Banking Market Intelligence Automation

- Built a Python automation pipeline to collect and process live banking market data using financial APIs.
- Analyzed stock performance for major banking stocks and generated Excel-ready analytical reports.
- Improved data quality through preprocessing, normalization, timezone handling, and API error management.

FI Calculations

- Developed a web application for financial calculations including returns, compounding, and investment metrics.
- Built reusable calculation modules and CSV-based financial data processing utilities.

Student Access Portal

- Developed a role-based portal for students, mentors, and administrators to manage campus-related workflows.
- Implemented secure access control and centralized information management for better transparency.

Self-Hosted Home Server Infrastructure

- Built a self-hosted Ubuntu Server using a repurposed laptop with CasaOS for personal cloud and application hosting.
- Configured Tailscale VPN for secure remote access and gained experience in Linux administration and networking.

EDUCATION

2023 – 2027	Bachelor's Degree in Computer Science, Data Science Specialization at SRMIST	GPA: 8.19
2023	Class 12th CBSE	64.6%
2021	Class 10th CBSE	71.8%

SKILLS

Languages	C, C++, Python, JavaScript, Kotlin
Frontend	React.js, HTML, CSS, Tailwind CSS, Responsive Web Design
Tools	Git, GitHub, VS Code, Android Studio, IntelliJ IDEA
Data	Pandas, Data Analysis, API Integration, Financial Time-Series Analysis
Systems	Ubuntu Server, CasaOS, Tailscale, Linux Administration, Self-Hosting
Soft Skills	Problem Solving, Team Collaboration, Communication, Analytical Thinking
